**DETAILED ACTION**

The recitation “plug-in” has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsai (U.S. Patent No. 5,798,849).

Regarding claim 1, Tsai discloses an optical scanner equipped with calibration film, which the optical scanner provides light incident upon a transmission-typed document and catches the image signals of the transmission-typed document by an optical chassis, comprising:

a scanning zone, capable of providing for placing the transmission-typed document (fig.4,scanned object 8, col. 4, lines 1-24); and

Art Unit: 2622

at least one attachment, capable of providing a calibration film for enabling the optical chassis to retrieve the image signals so as to improve the image brightness (figs. 2-4, col. 3, line 38 through col. 4, line 59).

Regarding claim 2, Tsai discloses the optical scanner equipped with calibration film of claim 1, wherein the attachment is a recess, and the calibration film is connected with the recess by pasting (fig. 2, col. 3, lines 41-56).

Regarding claim 4, Tsai discloses the optical scanner equipped with calibration film of claim 1, wherein the calibration film is a positive calibration film (col. 4, lines 25-53).

Regarding claim 5, Tsai discloses the optical scanner equipped with calibration film of claim 1, wherein the calibration film is a negative calibration film (col. 4, lines 25-53).

***Allowable Subject Matter***

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
